

Organisations working with Safeguarding Children

The Safeguarding Framework is broken into a number of phases and not every organisation is seeking accreditation; in addition, we offer bespoke child protection gap evaluations and an array of both online and face-to-face workshops on the child safe standards. The program outlines how an organisation can embed elements of good practice across a number of its management and practice systems in order to address known risk factors for organisational abuse, over several phases. We are delighted to be working in this way with the following organisations:

Anglicare NT
100 Story Building
